# HENSOLDT OPTARION®

More than just a tactical planning tool:

The modular solution for helicopter mission preparation, execution, analysis, debriefing and logistic support

- Certified in accordance with RTCA DO-278A AL4/5
- Mobile / shelterized and / or office solutions
- In service with the German Armed Forces since 2003
- Handling of data up to the classification SECRET

## OptaPlan

The module OptaPlan is developed for all needs related to mission planning, execution and analysis:

- Tactical mission planning by processing C3I information
- Extensive in-mission support such as simulation and analysis of mission events in 3D

## OptaSIR

The module OptaSIR is a solution for sensor evaluation and sensor planning:

- Web-based, operating system-independent sensor evaluation and sensor planning in the standard browser
- Expandable, modular architecture for the integration of various sensors

## OptaLog

The module OptaLog ensures the technical and logistical support to optimize aircraft availability:

- Intelligent MRO planning to reduce life cycle costs, provide optimized work orders and avoid unnecessary measures

## OptaFEP

The module OptaFEP is a Fleet Management System and the link between the aircraft fleet and the ERP System:

- Web-based, operating system-independent fleet management in the standard browser for decentralized logistics providing utilization overviews, maintenance plans and availability tables
- ERP interface using web technologies
